1. INTRODUCTION

IT procurement is an important process in an organization for providing the necessary hardware resources to users. Among these resources, laptops are commonly requested by employees for their daily work and operational requirements. A standard laptop request usually involves several activities, including placing the request, obtaining approval, creating a configuration task, assigning the task to the appropriate team, and preparing the laptop for the user.

In a manual IT procurement process, these activities may require considerable human intervention. This can result in delays, repeated administrative work, and the possibility of overlooking configuration tasks. In particular, standard laptop requests require configuration after procurement, and delays in assigning configuration tasks can increase user waiting time. The project “Streamlining IT Procurement: Automating Standard Laptop Tasks” focuses on developing an automated workflow using ServiceNow Flow Designer. The main purpose of the project is to automatically create a Catalog Task after the required approval and assign the task to the Hardware assignment group.

2. PROBLEM STATEMENT

The current IT procurement process lacks efficiency and automation, resulting in delays and manual overhead, particularly in handling standard laptop orders. Requests for standard laptops often require configuration, but this step is prone to oversight or delay, leading to frustration among users and inefficient resource allocation within the IT department.

2.1. PROJECT OBJECTIVE

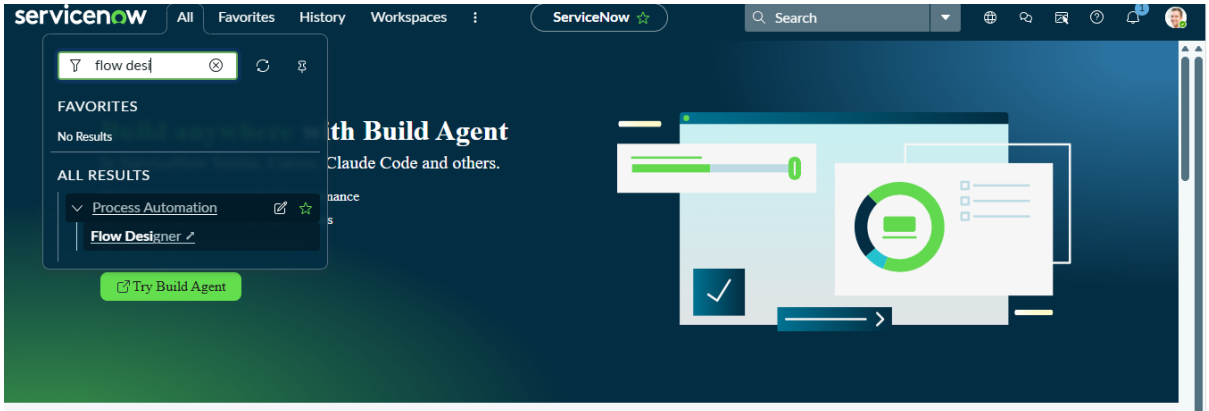

The objective of this project is to implement an automated workflow using Flow Designer to facilitate the procurement and configuration of standard laptops. By integrating automation into the process, the project aims to:

- Create a seamless experience for users requesting standard laptops by ensuring timely configuration.
- Reduce manual intervention and potential errors in the procurement process.
- Improve resource utilisation within the IT department by optimising task allocation.
- Enhance overall efficiency and productivity in IT procurement operation.

Milestone 1: Flow

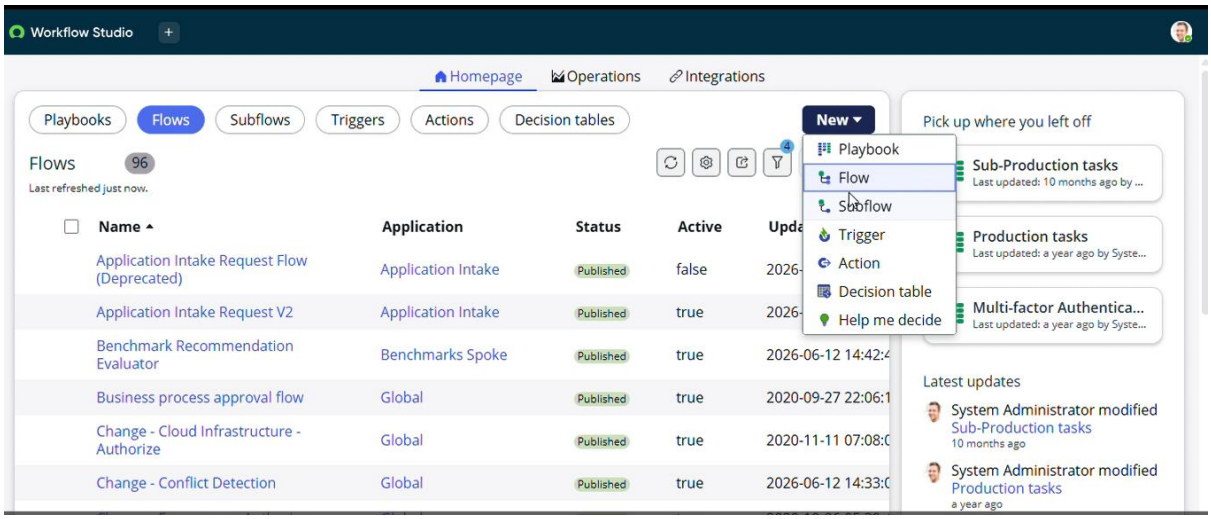

Activity 1: Create a Flow to Create Catalog task to update the short description after Approval the service Request and it will be Assignment group to Hardware.

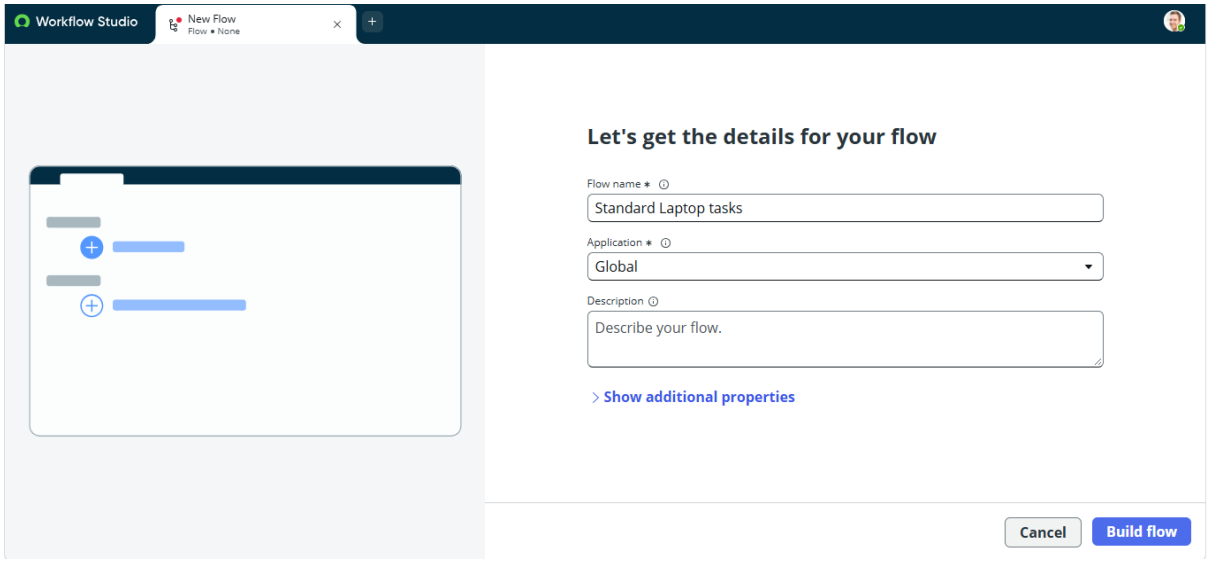

1. Open service now.
2. Click on All >> search for Flow Designer
3. Click on Flow Designer under Process Automation.
4. After opening Flow Designer Click on new and select Flow.
5. Under Flow properties Give Flow Name as “Standard laptop task”.
6. Application should be Global.
7. Select Run user as “System user” from that choice.
8. Click on Submit.

GO FURTHER

Power your workflow applications

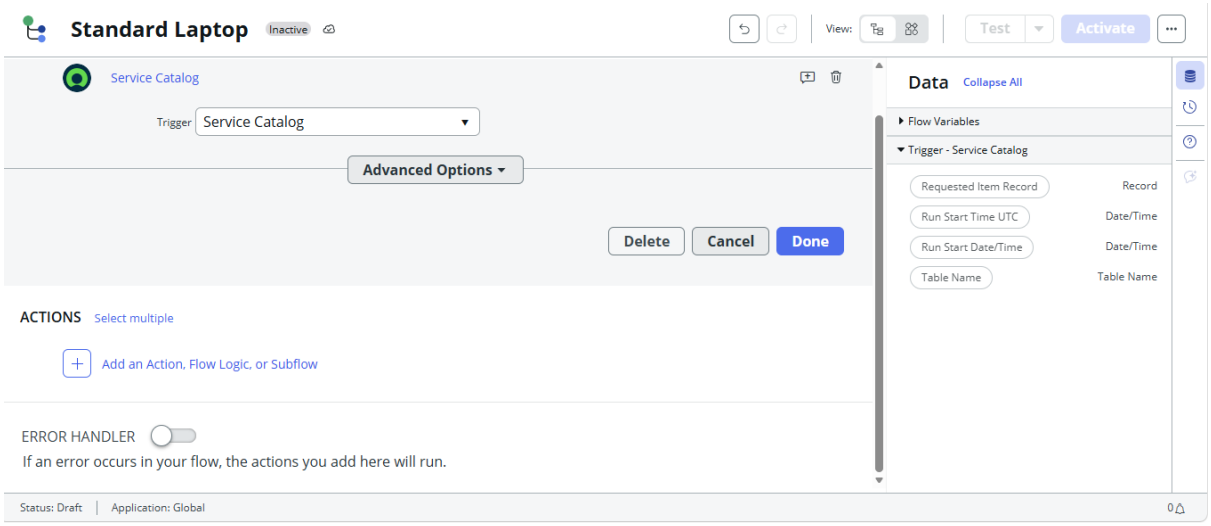

9. Click on Add a trigger

10. Select the trigger in that Search for “ ServiceCatalog ” and select that.

11. After that click on Done.

12. Now under Actions.

13. Click on Add an action.

14. Select action in that search for “ Create Catalog Task ” and select that.

15. Mention these in that action

16. Action as Create Catalog Task

17. Drag and drop the Requested Item Record in the Request item.

18. Table will be auto populated as a Catalog Task.

19. Mention the short description as “ Laptop need to Configured ”.

20. Click on add field value

21. Select description field and value as “ Laptop need to Configured ”.

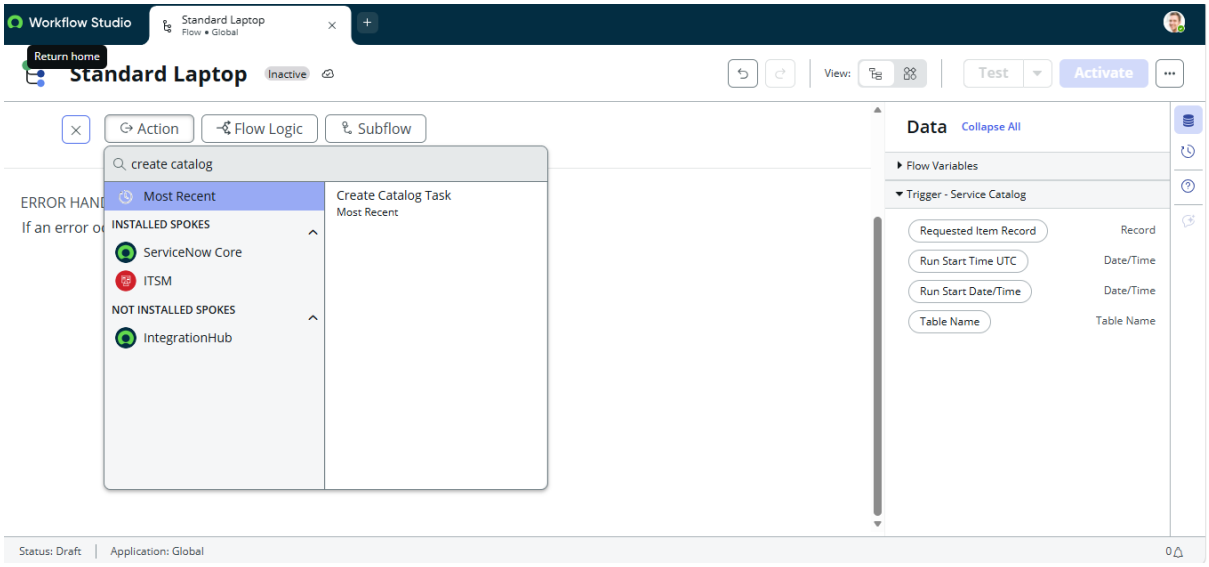

22. Select Assignment group field and value as “ Hardware ”.

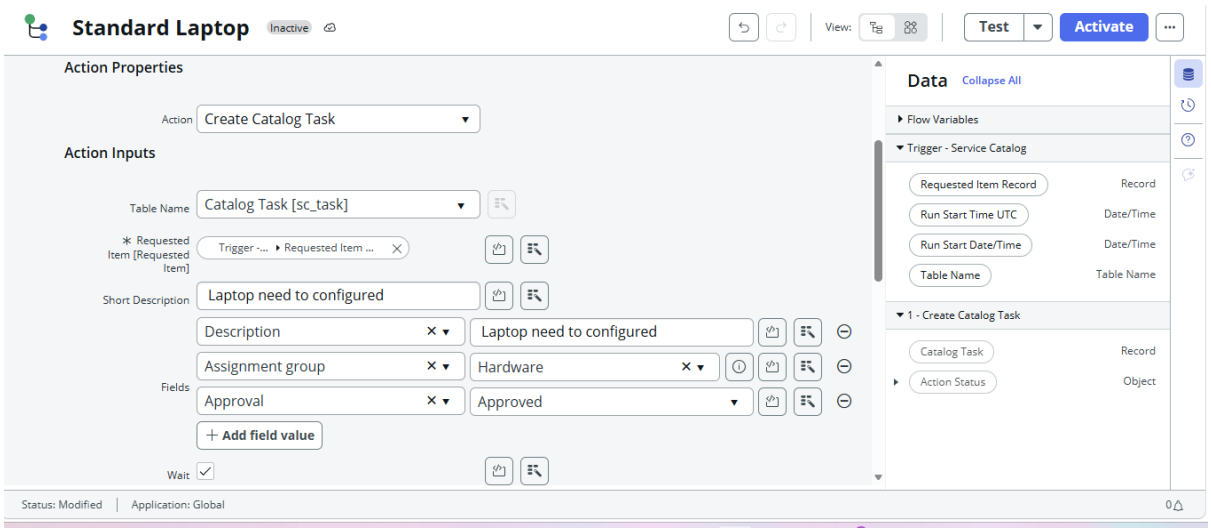

23. Select Approval field and value as “ Approved ”.

24. Leave the remaining as default and click on Done.

25. Click on save the Flow.

26. And Click on Activate again click on Activate.

Milestone 2 : Flow assignment

Activity 1 : **Flow Assignment to Standard laptop service Catalog**.

1. Open ServiceNow.

2. Click on all search for Maintain Items.

3. Select Maintain Items.

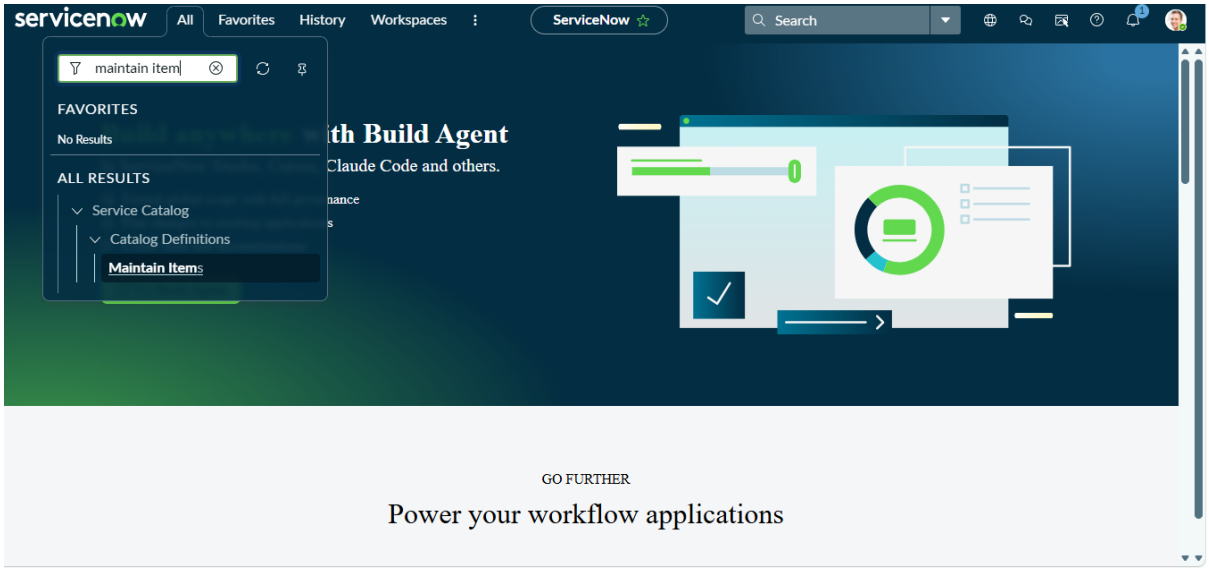

4. Under the name field search for Standard Laptop Select that record.

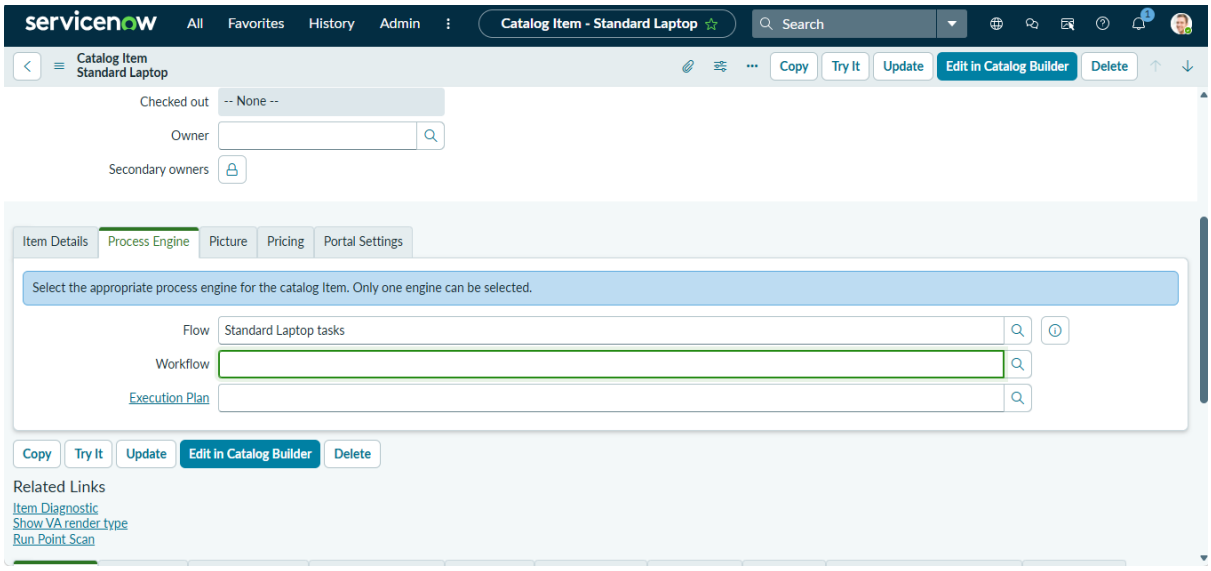

5. Under that record select Process engine

6. Remove the remaining automations and add Flow.

7. Add the flow that was created with the name “ Standard Laptop Task”.

8. Click on the menu to save the record.

Milestone 3 : Service Catalog

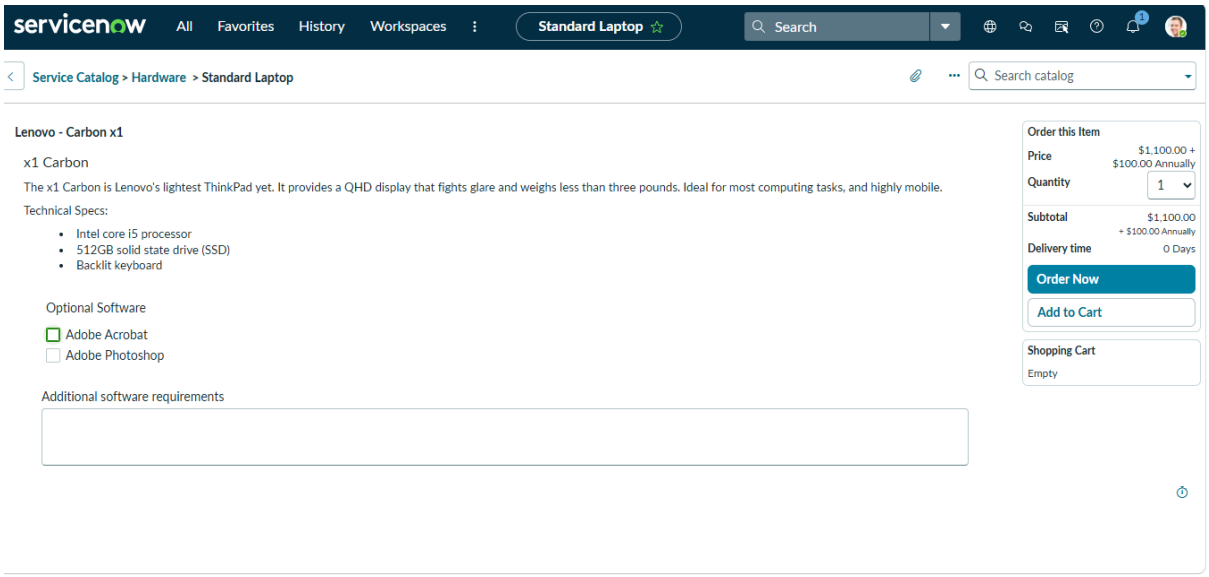

Activity 1: **Service Catalog for placing order and get Approval**

1. Click on All >> Search for “ Service Catalog ”.

2. Click on Service Catalog >> click on Hardware.

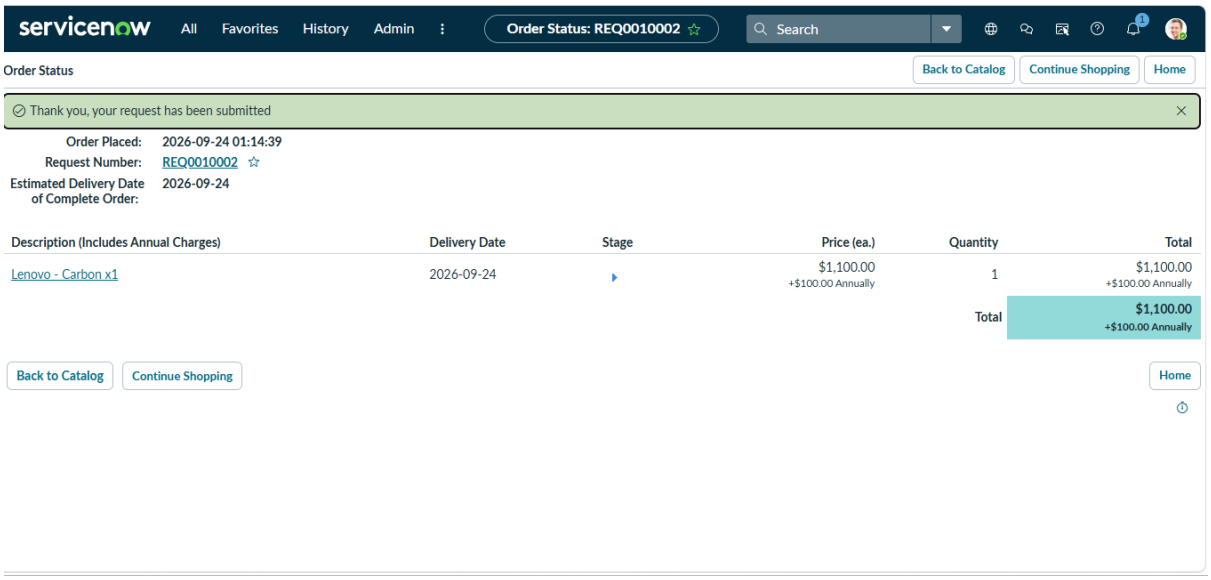

3. Scroll a bit to find the “ Standard Laptop ” click on that.

4. After that click on “ Order Now ” to place the request.

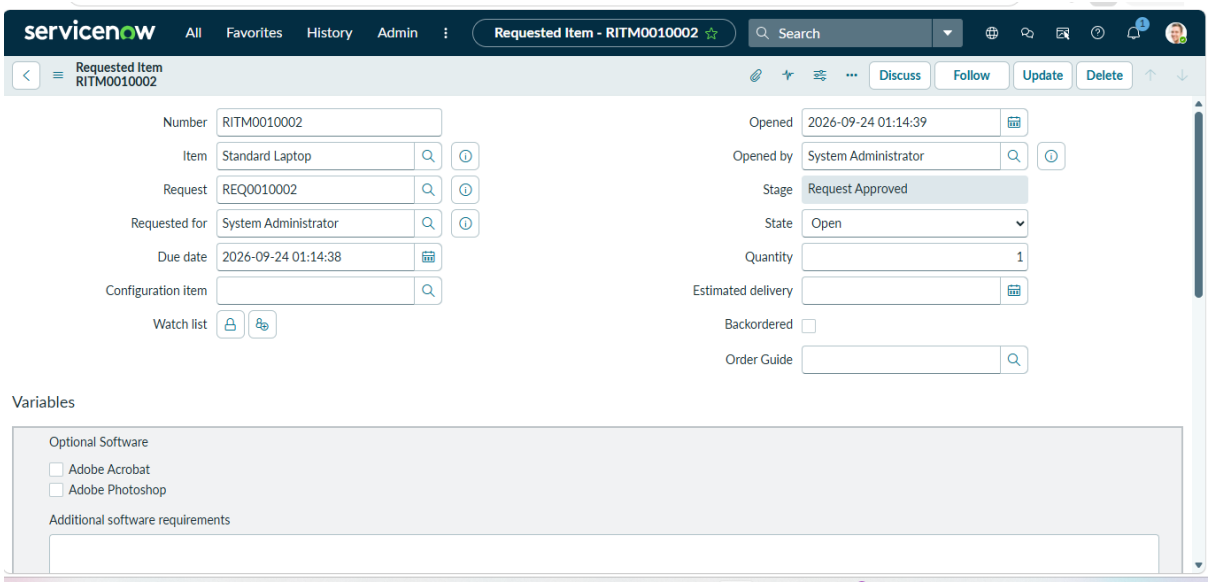

5. Now we will see the Order status

6. In that click on the Request Number

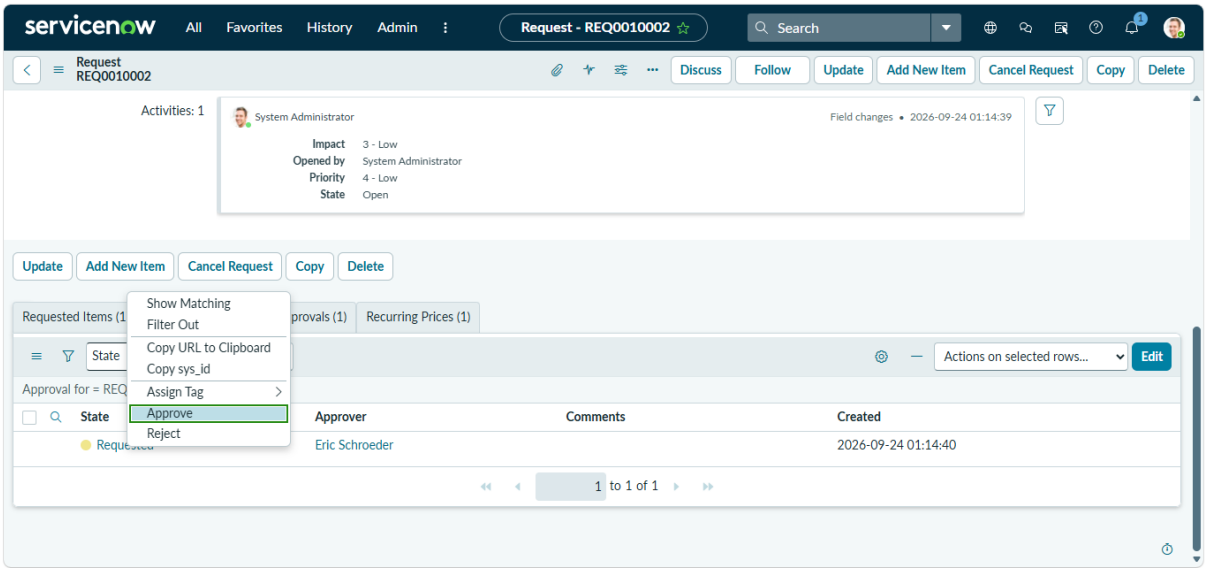

7. It will open the Requested number record.

8. Scroll down Click on the Approvers Section.

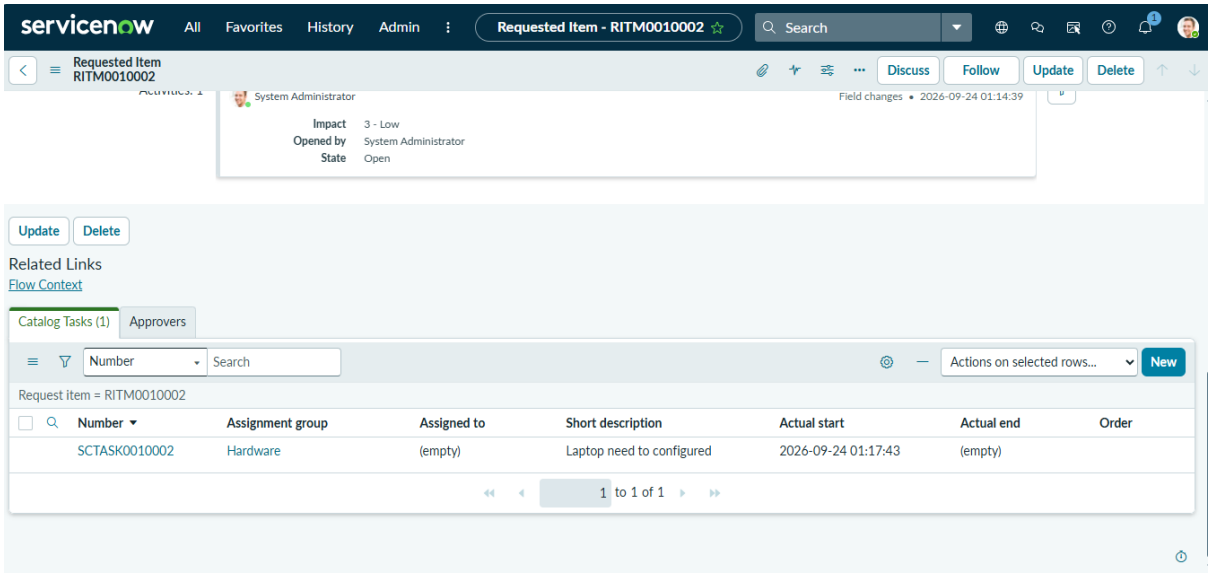

9. Right Click on the Record to see config in that Click on the Approve.

10. Then click on the Requested item Section

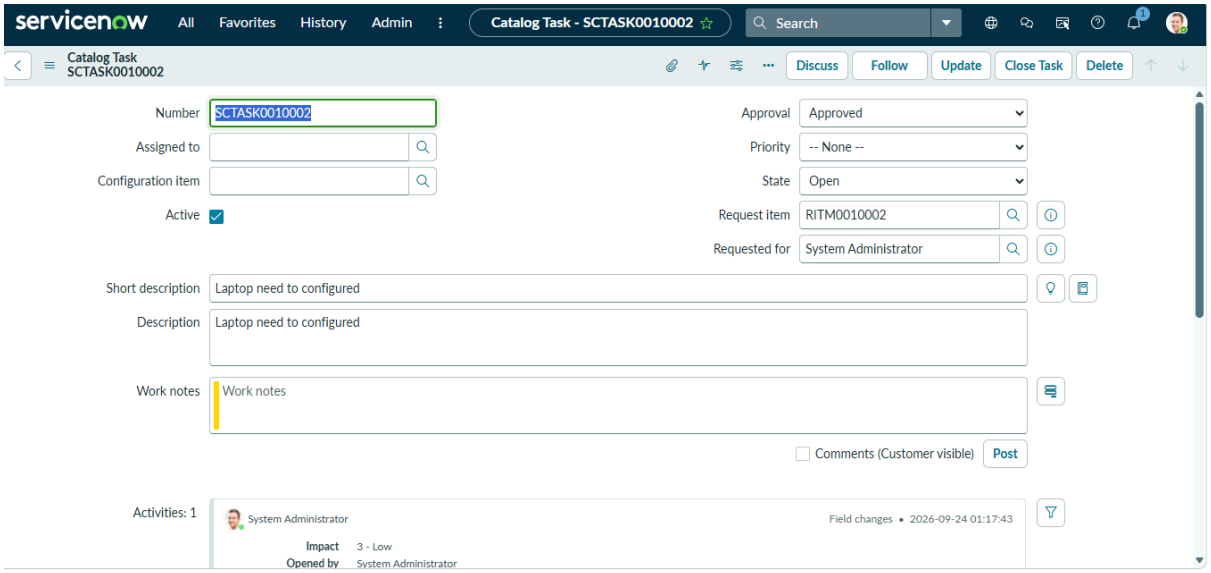

11. Open that Requested Item record

12. Scroll down to the “ Catalog tasks ” Section

13. Open the record to see the updated status of the record with Short description and

Assigned group.

CONCLUSION:

By automating the standard laptop procurement process with ServiceNow's Flow Designer, the project effectively addresses inefficiencies and reduces manual overhead. This streamlined workflow ensures timely configuration of laptops, minimizes user wait times, and enhances overall productivity within the IT department. The implementation of this automated solution not only optimizes resource allocation but also significantly improves the user experience by providing a seamless and efficient procurement process.
